

Aqua Pod

Wireless Tabletop Remote

Wireless Spa-side Remote

Wired Spa-side Remote

Wired Wall-mount Remote

FEATURES

- Turns ordinary salt into chlorine, automatically
- Supplies 100% of pool and spa sanitization needs
- Suitable for pools up to 40,000 gallons
- Full functional control of pool and spa and other outdoor features
- Can be programmed and controlled with optional remotes
 - Aqua Pod handheld, waterproof remote
 - Wireless and wired tabletop and wall-mount remotes
- Programs in minutes
- Fully programmable automatic control of every output
- Controls up to 4 relays, 3 valve actuators, 1 conventional heater and solar
- Super chlorinate feature
- Digitally displays time, day, pool and spa temperature, salt levels and ambient air temperature
- Built-in 100A subpanel
- 3-Year Limited Warranty (see manual for details)

OPTIONAL REMOTES

Aqua Pod – waterproof, fully programmable, handheld remote

Wired Remotes – suitable for indoor or protected outdoor locations

Wired Spa-side – six-function control

Wireless Remotes – suitable for indoor or protected outdoor locations

Wireless Spa-side – waterproof, floating remote with on/off control of major functions

ORDERING INFORMATION

Aqua Plus	
PL-PLUS	4 relays, 3 valves, 1 heater, solar and salt chlorination for pools up to 40,000 gallons
Base Stations and Remotes	
AQL2-POD	Aqua Pod waterproof handheld remote control
AQL2-SS-RF	Wireless spa-side remote
AQL2-TW-RF-P-4	White, wireless tabletop remote
AQL2-TB-RF-P-4	Black, wireless tabletop remote
AQL2-BASE-RF	Base station, used with AQL2 wireless remotes
AQL-WW-P-4	White, wired wall-mount remote
AQL-SS-6B-x (x=W/B)	Wired, 6-function spa-side remote control
Sense and Dispense, Total Pool Chemistry	
AQL-CHEM	ORP and pH Sense, ORP Dispense
AQL-CHEM2	pH Dispense, 120V Solenoid Valve for CO ₂
AQL-CHEM2-240	pH Dispense, 240V Solenoid Valve for CO ₂
AQL-CHEM-UPG	Chemistry Chassis Retrofit Kit (Includes AQL-CHEM and communication board. Add AQL-CHEM2 for pH dispense.)

Aqua Plus™ Automation Plus Salt Chlorination

Create and control your ideal backyard experience and keep your pool sanitized automatically.

Aqua Plus simplifies and enhances pool and spa ownership by combining automated control and salt chlorination into one easy-to-install, easy-to-operate package.

With Aqua Plus, programming essential functions for maximum performance, effectiveness and cost-efficiency is a snap. Take filtration or water temperature, for example. Aqua Plus lets you set any schedule you choose: steady all week, increasing during busy weekends or cutting back on weekdays when activity is limited. You can even program your pool lights or spa jets to go on or off automatically.

Another great Aqua Plus feature is salt chlorination. Instead of mixing, measuring and messing around with chemical liquid or tablet chlorine, Aqua Plus uses an extremely safe electrical charge to automatically turn a small amount of ordinary salt into a self-renewing supply of fresh, pure chlorine. It keeps your water consistently clean, clear and silky smooth.

SENSE AND DISPENSE™, TOTAL POOL CHEMISTRY™: WORK LESS, PLAY MORE

The industry's only integrated Total Pool Chemistry option that continuously senses ORP and pH levels and dynamically dispenses a self-renewing supply of fresh, pure chlorine – generated from ordinary salt – while controlling

pH levels. Now you can achieve the most consistent water quality possible, water that's brilliant, soft and silky smooth, automatically.

YOU'RE IN CONTROL, RIGHT FROM THE START

Aqua Plus gives you total control over your pool and spa functions and entire backyard. You decide the schedules for heaters, pumps, lighting and more. Programming is simple — designed to be mastered in minutes, not hours. Instructions are clear and concise, with easy-to-follow photo illustrations. There's even a setup reminder located on the unit itself.

Aqua Plus can even be used to control other backyard features, including outdoor lighting, water features and sprinklers. And with your choice of optional remote controllers, you can program and manage it all from practically anywhere: indoors, poolside or – with our

revolutionary Aqua Pod™ – even in the water.

The Aqua Plus base system includes 4 relays, 3 valves, 1 heater, solar and salt chlorination for programming and control of:

- Water temperature (gas, electric and solar heaters)
- Filtration cycles (daily/weekly; time of day/duration)
- Pool lights (on/off/timed)
- Spa jets (on/off/timed)
- Backyard lighting (on/off/timed)
- Sprinklers (on/off/timed)
- Water features (on/off/timed)

SALT-BASED CHLORINE: THE NEXT GENERATION OF PURIFICATION

Say good riddance to buying, handling and storing harsh, toxic factory-produced chlorine. And say hello to the convenience, safety and economy of Aqua Plus electronic salt-chlorine generation.

From a small amount of ordinary salt dissolved in your pool water and circulated through your existing filtration system, Aqua Plus automatically generates a continuous – and self-renewing – supply of fresh, pure chlorine, about 1.45 pounds a day. That's enough to keep every drop of water in a 40,000-gallon pool clean, clear and luxuriously soft. Not to mention gentle and odor-free.

Here's how it works. As the ever-so-slightly-salted water passes through the unit's specially-designed Turbo Cell®, a safe electric charge turns the salt into chlorine.

Technically speaking, this turns sodium chloride into chlorine. And every time this new chlorine passes through the Turbo Cell, it gets recharged. So after you add salt the first time, you practically never have to add any more. That not only saves you time, it saves you money.

Aqua Plus Uses a Minimal Amount of Salt
