

AQUA RITE®

ELECTRONIC CHLORINE GENERATOR

GOLDLINE
CONTROLS INC.
A HAYWARD COMPANY

Aqua Rite

The Aqua Rite Electronic Chlorine Generator (also known as a salt chlorinator) is the largest selling system in the world. It automatically produces pure chlorine every day while the pool is being filtered and distributes it evenly throughout the pool via the return jets. The Aqua Rite uses a low concentration of salt dissolved in the pool water (below the level of taste) to produce up to 1.45 lbs of chlorine daily, enough for all residential pools up to 40,000 gallons. It is also NSF certified and approved for use on commercial and public pools. The Aqua Rite easily installs on all standard filtration systems, both for new construction and on existing pools.

Applications

- For residential pools up to 40,000 gallons.
- For commercial pools up to 25,000 gallons
- Use multiple units for larger pools

Features

- Simple homeowner operation
 - ✓ Adjust chlorine output from 1-100%
- The best water quality attainable
 - ✓ Always crystal clear and ready for swimming
 - ✓ Soft silky feel—no more red eyes or dry skin
- Microprocessor automates all functions
- Digital salt display and 8 diagnostic indicators
- Patented Turbo Cell for maximum efficiency and flow rates
- Super chlorinate function
- Automatically cleans the cell by periodically reversing polarity
- Quick, weatherproof connections inside control door
- Single unit for 120VAC/240VAC 50/60 Hz power input
- Locking weatherproof enclosure
- UL and CUL Listed, NSF certified
- 5 Year Limited Warranty (See manual for complete details).
