

WIRELESS TABLE TOP DISPLAY

This portable display/keypad with rechargeable batteries allows the homeowner to control the system from anywhere around the pool area or inside the house. Designed for indoor or outdoor use but must be protected from direct rain contact.

Applications

- Use with Aqua Logic PS-4/8/16
- Order model to match system type
- **Wireless Base required**

Features

- Rechargeable batteries
- Available in Black or White
- Manual operation of all equipment
- LED indicators indicate on/off status of all equipment
- Complete programming of automatic functions
- System Off button turns all equipment off with a single button press
- Plug-in transformer for battery charging included

WIRELESS WALL MOUNT DISPLAY/KEYPAD

Wireless wall mount display/keypad eliminates the expense and hassle of running a communication wire from the equipment pad into the house. Uses plug-in wall transformer for power.

Applications

- Use with Aqua Logic PS-4/8/16
- Order model to match system type
- **Wireless Base required**

Features

- Manual operation of all equipment
- LED indicators indicate on/off status of all equipment
- Complete programming of automatic functions
- System Off button turns all equipment off with a single button press
- Plug-in transformer for power included
